You didn't arrive here by accident.
Something within you is no longer satisfied with surface-level living.

You are no longer willing to wait, shrink, delay, or negotiate your own expansion.

Go Can You

I am glad that I joined her sessions 😊

Attending this I could face my fear and take few major projects In compare to playing safe and taking only one project at a time.

I learnt the power of gratitude and how I can shine the light on me for my small achievements which leads to big achievements 💖

I learnt fear of failure is not the worst part is not taking action, it was the fear of REGRET.

Could face my fear and take few major projects.....

Changed every negative of life into a blessings - showed me how to think differently and behave in a certain way to become successful in all areas of life....

The day I had my first face to face interaction with @Barinderjeet Kaur, I was depressed, angry, disappointed, full of regrets and complaining about this life and I was facing one challenge after the other in my way. It was so disappointing that I could not even see the way. I was ready to quit all relationships, business and even my life. I know it sounds too much. Yes, that's exactly how I felt last year.

I did not know Barinderjeet before. And she was not a common contact either. I just randomly clicked on an interview and listened to her. Then I visited her Facebook profile. There I found out more about her work. I was impressed. I connected with her right away. I had a subtle feeling that she can help me find a solution to at least some of my problems. Then we met on the zoom. I must say, I was very transparent, straight up and open with her from the day one and just kept throwing all the thoughts (most of them were negative) at her. Now when I look back, I realize that she kept catching all those thoughts and turned them into the jewels of positive transformation and I'm grateful to God that I had an open heart to catch them back. It took me a little while to understand what was happening there. She had all the positive answers to my negative questions. I was not wrong. I just did not know. She educated me on how to think, behave, breathe, love, appreciate, be grateful, learn, be patient, implement and be consistent to see the face of success in all areas of life.

Go Can You

A big thank you 🙏 to Barinderjeet Kaur for all the Guidance and learnings .

I joined Barinderjeet in June and it was good investment that at first I thought was to learn how to be successful in Business as I started Digital Business but no idea how this works . At first I was very skeptical 🤔 about this investment but as I did sessions with her I realised that it is not only good for my professional growth but I am different person also and it's not just me who felt difference in my personality but my family also told me .

It feels like I have come out of my shell and a new person is here who is ready to change her life .

Thank you and again and I would recommend Barinderjeet to anyone who thinks it is big investment to join her but results will satisfy you and you won't regret it later 🙏💖

*Changed my relationship with Money.....
I am more flexible and focused with my approach....*

Have experienced a shift in overall personality (for Business as well as Personal), finds 'it's well worth the investment'.....

Barinderjeet taught me the importance of material things and money in life that we can use for a higher purpose. She shifted my focus and perspective of money being evil to a blessing that we can use to make ours and others' lives better. The fire is within us. We can either use it to create a spark within to level up big time or we can use it to create fire around us. I choose to create the spark within to level up. She also taught me the most important lesson in life. FLEXIBILITY. This one landed. If you learn to use flexibility and give up being rigid in life, you can find a perfect balance that will help you find your true purpose and achieve those goals that you only put on your vision board and struggle to manifest in real life. In a nutshell, flexibility, implementation, and focus is the key. Love the energy and this feeling of feeling as light as a feather. Thank you so so much for all your love, care and wisdom that you shower upon all of us 🙏🙏🙏💖💖💖

Go Can You

Those kind words of wisdom saved me from drowning in my own negative thoughts and emotions. Each time I faced a challenge with courage, there was a breakthrough. That's the most important lesson I learned on this journey with @Barinderjeet Kaur. Now when I look back, all my trainings were paid off magically. Even though, I was broke in the beginning, I always had enough to pay EYD, buy a car and buy a house. On top of that, I Achieved multiple milestones and became a coach during the same time.

It all happened with mutual trust, hard+smart work and being consistent. Most importantly, believing in yourself and understanding how energy works for you. Once you are able to balance your energy and understand others' as well, it's a win win for everyone. I wish everyone a breakthrough in business and harmony in life 🙏🥰💖

After joining with in few months became a Coach, bought a new house, achieved multiple milestones and own a car of my choice.....

The MAGIC is real.....
She walks with me & holds my hand.....
I wish everyone get to experience this magic...

Hello beautiful people!!!

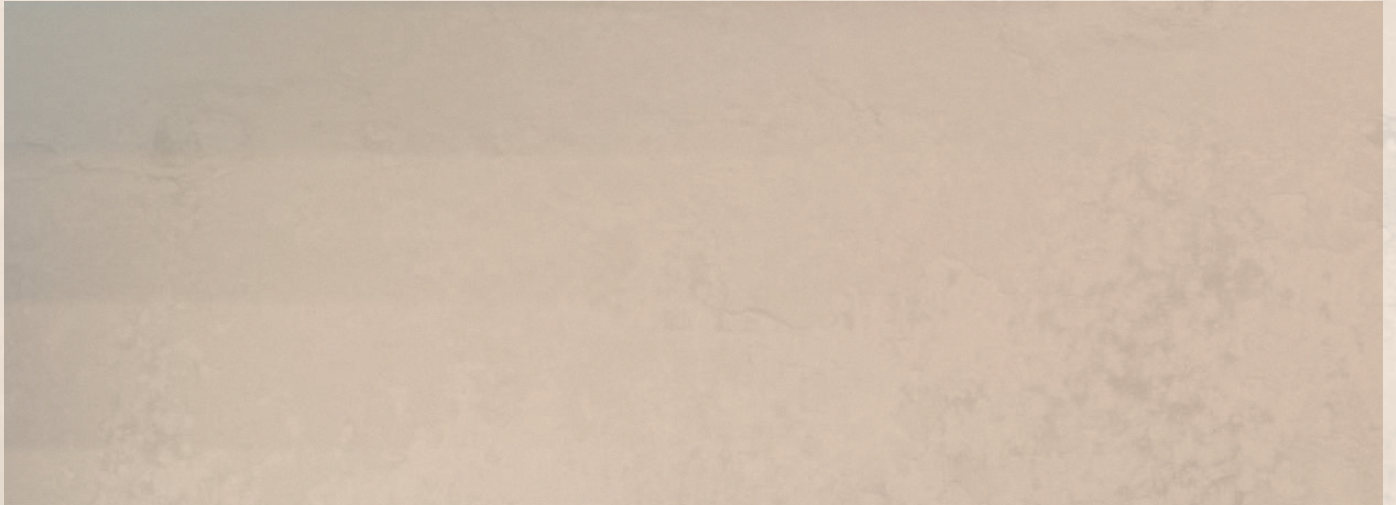

I often fall short of words when expressing my gratitude towards @Barinderjeet Kaur for carving me into who I am today.

Today's session was one of those meaningful conversations that take you to a level where you may have imagined to be before but you do not know how to get there. I was very clear on what I want but she held my hand and walked with me to take me there and helped me lock that thought and feeling. I am not surprised or have any second thoughts this time because when she held my hand and took me to this particular place last time, I actually landed there in real life. Today I want to scream it to the world that THE MAGIC IS REAL. I found it. And I wish everyone to find it in their lifetime.

I have learnt a lot of new perspectives about my self and definitely for my audience. My energy level is boosting every day and I am so positive. I was taking antidepressants from last one year but from my last 1-1 session till today I haven't taken a single pill and still I am with full energy and no negative thoughts. That's the biggest milestone I have achieved.

Definitely my business is boosting as well. I have found so many opportunities which were always in front of me but I never realized.

Again very grateful and thankful to Barinder dii 🥰🥰

After joining EYD I have stopped taking antidepressants which I was taking from last 1 year....

Learnt to level up in profession.....
I understand different energies and utilise them to understand my kids....

Today's session with Barinder 💖 has made my day, started my day full of positivity and energy. I learnt to level up in my profession and accept the challenge. There's always an opportunity on the other side of the challenge which we never know.

She is a bundle of new ideas with many options which helped me to choose the right way to my goals.

I understand the different energies and utilising them to understand our own kids was amazing.

Thanks a lot Barinder for making me understand not only business but my kids behaviour too 🙏

with [Barinderjeet Kaur](#) that SHE felt and I knew that I needed badly. Like an angel she calls me when I most need a support. She taught me how to turn my PAIN into POWER.

You didn't arrive here by accident.
Something within you is no longer willing to live on
default.

No longer willing to delay.
No longer willing to shrink.
You are not here to repeat history.
You are here to create destiny.

Awareness is powerful.
But embodiment is transformational.

You now have the framework.
You can absolutely walk this path on your own.

But here's the truth:
Momentum multiplies with guidance.
Blind spots dissolve with reflection.
Identity shifts faster when you are supported.
